New York University College of Dentistry  
Linhart Continuing Dental Education Program  

“Current Concepts in American Dentistry: 
Advances in Clinical Aesthetics and Oral Rehabilitation”

September 28-October 2, 2015  
Chile/Ecuador/Venezuela B# 6F

Monday, September 28, 2015 .................................................. 9:00 a.m. – 4:00 p.m.

Dr. Howard GLAZER

Dr. Glazer is a Fellow and Past President of the Academy of General Dentistry, and former Assistant Clinical Professor in Dentistry at the Albert Einstein College of Medicine (Bronx, NY). He has been a visiting clinician at several universities around the country. He is a Fellow of the American College of Dentists; International College of Dentists; American Society for Dental Aesthetics, the American Academy of Forensic Sciences, and a Diplomate of the American Board of Aesthetic Dentistry. Dr. Glazer is an Attending Dentist at the Englewood Hospital (Englewood, NJ). Additionally, Dr. Glazer is the Deputy Chief Forensic Dental Consultant to the Office of Chief Medical Examiner, City of New York. For the past several years, Dr. Glazer has been named as one of the “Leading Clinicians in Continuing Education” by Dentistry Today, and most recently was named as one of the Top Dentists in New Jersey by New Jersey Monthly & 201 Magazine. He lectures throughout the United States, Canada, and overseas, on the subjects of dental materials, cosmetic dentistry, forensic dentistry and patient management. Additionally, Dr. Glazer is a frequent author of dental articles and has been published throughout the world. Currently he publishes a monthly column in AGD IMPACT entitled “What’s Hot and What’s Getting Hotter!” He maintains a general practice in Fort Lee, NJ.

“What’s Hot and What’s Getting Hotter”

This is a program about real dentistry for real people by a real dentist! Dr. Glazer will present a potpourri of materials and techniques that will make your day at the office easier, more productive and fun! Your entire dental team will benefit from learning about the latest products and benefits provided for you and your patients. Dr. Glazer writes a monthly column by the same title for AGD Impact magazine, and reviews new products and materials on a regular basis for his column. Topics include:

- Curing lights..to light up your life (dental)
- Desensitization & Adhesives..a sticky subject made simple
- Composites for esthetic fillings not just white ones
- ICON Infiltration technique..for minimally invasive procedures
- Impression materials..it’s true..first impressions are important
- Provisional materials..provisionals should look great
- Burs..so many and so little time
- Lasers..simple, easy and quick w/ great results
- Endodontic instruments..getting to the root of the matter
- Cements..that which holds the relationship together
- Tissue retraction and fluid control...essentials of clear fields
- Reducing Sensitivity with topical paste application & Fluoride varnishes
- Matrix bands for perfect, predictable contacts..contact perfect every time
- Whitening systems..that work
- Oral cancer prevention..dentists can save lives!
- Biodentine...dentine in a capsule!
- Thermoplastics...easy to use
- Patient communication...high-tech and really cool!
- Going Digital..simple, easy and soon to be a must!
- Loupes, instruments, equipment potpourri
Tuesday, September 29, 2015 9:00 a.m. – 4:00 p.m.

Dr. Stephen CHU

Dr. Chu is a Clinical Associate Professor in the Ashman Department of Prosthodontics, Periodontology, and Implant Dentistry at New York University College of Dentistry. He maintains a private practice in fixed prosthodontics, esthetic, and implant dentistry in New York City. Dr. Chu has published extensively in the dental literature and has given lectures nationally and internationally on the subjects of esthetic, restorative, and implant dentistry. Dr. Chu is on the editorial review board of several peer-reviewed dental journals. He is the recipient of the Dr. Peter Scharer distinguished lecturer award from the European Academy of Esthetic Dentistry. Dr. Chu is the creator of Chu’s Aesthetic Gauges manufactured by Hu-Friedy Co., Inc.

“Microesthetic Determinants for Teeth and Implants: Tooth Size and Individual Proportion”

Comprehensive treatment planning of the complex aesthetic restorative case involving teeth and implants can be challenging. The key to success is to understand and develop predictable strategies in patient care.

The presentation will focus on diagnosis of facial, dento-facial, dental, and gingival discrepancies. Solutions will focus on interdisciplinary treatment, including orthodontics, periodontics, restorative, and implant dentistry. The latest research in these areas will be presented as well as innovative instrumentation to obtain these goals.

Wednesday, September 30, 2015 9:00 a.m. – 4:00 p.m.

Dr. Michael SONICK

Dr. Michael Sonick is a full time practicing periodontist and implant surgeon in Fairfield, Connecticut. He currently is a Guest Lecturer at New York University School of Dentistry in their international dental program and was previously a Clinical Assistant Professor in the Department of Surgery at Yale University School of Medicine and University of Connecticut School of Dental Medicine. He is on numerous editorial boards including the Compendium of Continuing Dental Education, Journal of Cosmetic Dentistry; Inside Dentistry, Dental XP, and Journal of Implant and Advanced Clinical Dentistry. He is co-editor of the textbook Implant Site Development and a Diplomate of the International Congress of Oral Implantology.

“Periodontal Esthetics: Gingival Augmentation Procedures”

The multiplicity of manners to address the discrepancies of dental gingival anatomy will be addressed. Advances in plastic surgical techniques have given us the ability to predictably regenerate lost gingival tissues. Techniques for connective tissue and free gingival grafting will be demonstrated and shown.

Regeneration of the lost periodontium is not only possible but also predictable. Techniques for augmenting gingival tissue around the teeth will be shown. The technique and indications for the free gingival graft and subepithelial graft will be elucidated. In addition the management of the edentulous ridge will be discussed. Techniques for ridge augmentation at the time of extraction and post extraction will be demonstrated.

Topics to be discussed:

- Ideal gingival esthetics
- Gingival augmentation techniques for root coverage
- Subepithelial connective tissue graft
- Full and split thickness techniques
- Tunneling procedures
- Free gingival graft Soft tissue grafting with ADM (acellular dermal matrix)
- Ridge augmentation procedures
- Preventing ridge collapse
- Recapturing extraction sites
- Pontic designs and site development
- Creating the ovate pontic
- Smile design
- Sequencing restorative and surgical treatment
Dr. Guido SARNACHIARO  
Clinical Assistant Professor, Department of Prosthodontics, Columbia University College of Dental Medicine, New York City; Clinical Assistant Professor, Department of Periodontology and Oral Implantology, Temple University School of Dental Medicine, Philadelphia, Pennsylvania; Clinical Assistant Professor, Implant Program, Department of Prosthodontics and Clinical Research, Buenos Aires, Argentina; Member, International Congress of Oral Implantology and Academy of Osseointegration; Private Practice in New York City.

“Therapeutic Sequence in Advanced Implant Rehabilitation: The Serial Extraction Protocol”  
(9:00 a.m. – 12:00 noon)

Dr. Paul FLETCHER  
Dr. Fletcher is a periodontist who practices in New York City and as a member of Specialized Dentistry of New York, a group implant, cosmetic specialty practice. He is an Associate Clinical Professor at the Columbia University College of Dental Medicine, where he teaches periodontics and implant dentistry on a post-graduate level. Dr. Fletcher has had more than two dozen papers published in the dental literature and has lectured on periodontal prosthetics and implant dentistry both nationally and internationally.

“Restorative Aesthetic Challenges Around Teeth and Implants”  
(1:00 p.m. – 4:00 p.m.)

As patient’s demands for excellence in aesthetic dentistry increase, it’s imperative that dentists have knowledge of the restorative principles involved in achieving this goal. This presentation will offer information that will allow the practitioner to produce restorations of the highest technical, biologic and aesthetic quality around both teeth and implants. Among the topics the participant will have an understanding of upon the completion of this presentation are:

1) The indications and techniques for immediate implant placement and restoration in the aesthetic zone.
2) Maintaining and reforming the interdental papilla around teeth and implants.
3) Optimizing restorative results following surgical anterior aesthetic crown lengthening utilizing an understanding of tooth biometrics.
4) The significance of maintaining crestal bone to optimize implant restorative aesthetics.
5) Restorative treatment planning in the aesthetic zone integrating splinted and non-splinted teeth and implants.
George E. ROMANOS, DDS, PhD, Prof. Dr.med.dent.
Professor of Periodontology at the Stony Brook University, School of Dental Medicine; Professor for Oral Surgery and Implant Dentistry in Frankfurt, Germany; Fully trained in Periodontics, Prosthodontics and Oral Surgery in Germany and NY; Board Certified in Oral Surgery and Implant Dentistry in Germany; Certificate in Periodontology and AEGD (Univ. of Rochester); Diplomate by the American Board of Periodontology and the Int. College of Oral Implantology (ICOI); Former Professor and Director of Laser Sciences at NYU College of Dentistry; former Professor of Clinical Dentistry at the Univ. of Rochester, NY; Dental License in NY State and in Europe.
Fellow of the Academy of Osseointegration (AO), the Int. College of Dentists, ICOI, ITI foundation, American Society for Laser Medicine and Surgery and the International Academy for Dental Facial Esthetics.
Editorial Boards: IJOMI, Clin. Impl. Dent. and Relat. Res (member), J Prosthodontics (member), Odontology (Associate Editor), Photomedicine and Laser Surgery (member), Quintessence Int (member), Compendium (member), J Periodontology (peer review panel), Int. J Dent (member) and others; more than 250 publications, author of 5 books; over 500 presentations worldwide.

“Advances and Innovations in Ridge Augmentation: Aesthetics and Clinical Considerations”

There is no doubt that augmentative procedures are common in the daily practice. For the narrow alveolar ridge, there are various alveolar extension plastic procedures allowing increase the width of the ridge with many limitations. However, augmentative procedures are successful and dependent on different host response and definitely the surgical approach. The presenter will demonstrate different concepts of therapy and will address the biological concepts besides the management of complications. The surgical steps and the requirements for the success are here discussed presenting also the opportunity of treatment using different loading protocols. The management of the insufficient width as well as the increase in the height in the posterior and anterior parts of the jaws will be demonstrated. Special focus will be the vertical augmentation technique in order to have a good and predictable result.
